

# **IMPORTANT UPDATE**

## **CHANGES IN MATHS AND SCIENCE EXAM FORMAT**

Starting from the next examination period, 100% of the questions in your Maths and Science exams will be in the form of multiple-choice questions. These will include three types:

1. **4-option multiple-choice questions:** Choose the correct answer from four given options.
2. **True-False questions:** Determine the truthfulness of multiple statements based on a single problem or situation.
3. **Numerical questions:** Calculate and select the correct numerical answer.

Please note that for diagram drawing or shape construction questions, you will still be required to complete these tasks manually.

We believe this change will streamline the assessment process and provide a clear evaluation of your understanding and skills.
